**BEFORE THE BOARD OF OIL, GAS AND MINING
DEPARTMENT OF NATURAL RESOURCES
STATE OF UTAH**

IN THE MATTER OF THE JOINT REQUEST
FOR AGENCY ACTION OF BILL BARRETT
CORPORATION AND EP ENERGY E&P
COMPANY, L.P. FOR AN ORDER MODIFYING
THE BOARD'S ORDERS ENTERED IN CAUSE
NOS. 139-84, 139-85, 139-87 AND 139-90 TO
AUTHORIZE ADDITIONAL VERTICAL
AND/OR DIRECTIONALLY DRILLED WELLS
TO ACHIEVE THE EQUIVALENT OF UP TO
AN 80-ACRE WELL DENSITY PATTERN FOR
THE PRODUCTION OF OIL, GAS AND
ASSOCIATED HYDROCARBONS FOR THE
LOWER GREEN RIVER-WASATCH
FORMATION ON THE SECTIONAL
DRILLING UNITS COMPRISING THE BLACK
TAIL RIDGE, LAKE CANYON AND
PORTIONS OF THE WESTERN ALTAMONT
FIELDS, DUCHESNE COUNTY, UTAH

**FINDINGS OF FACT,
CONCLUSIONS OF LAW AND
ORDER**

Docket No. 2014-035

Cause No. 139-124

This Cause came on for hearing before the Utah Board of Oil, Gas and Mining (the "Board") on Wednesday, October 22, 2014, at approximately 2:00 p.m., in the Auditorium of the Utah Department of Natural Resources Building in Salt Lake City. The following Board members were present and participated at the hearing: Chairman Ruland J. Gill, Jr., Michael R. Brown, Carl F. Kendell, Chris D. Hansen, Susan S. Davis and Gordon L. Moon. Board Member Kelly L. Payne was unable to attend. At the commencement of the hearing, Mr. Moon disclosed he owned mineral interests within the

lands at issue and offered to recuse himself if there were any objections to his participation, but no objections were voiced and he participated accordingly. The Board was represented by Michael S. Johnson, Esq., Assistant Attorney General.

Testifying on behalf of Co-Petitioner Bill Barrett Corporation (“BBC”) were David M. Watts – Land Manager, Daniel S. Moore – Asset Development Geologist, and Anna M. Young – Engineering Manager. Testifying on behalf of Co-Petitioner EP Energy E&P Company, L.P. (“EPE”) were Michael J. Walcher – Land Advisor, and Ronald L. Schneider – Senior Staff Geologist. Messrs. Moore and Schneider were recognized by the Board as experts in geology, and Ms. Young was recognized by the Board as an expert in reservoir engineering, respectively, for purposes of this Cause. Frederick M. MacDonald, Esq., of and for MacDonald & Miller Mineral Legal Services, PLLC, appeared as attorney for BBC and EPE.

The Division of Oil, Gas and Mining (the “Division”) did not file a staff memorandum in this Cause but participated in the hearing. Steven F. Alder, Esq., Assistant Attorney General, appeared as attorney for the Division. Mr. Alder made a statement expressing the Division’s support for the granting of BBC’s and EPE’s Joint Request for Agency Action filed on September 10, 2014 in this Cause (the “Request”) as conformed to the testimony and other evidence provided at the hearing, but with the

caveat and recommendation that the Board not adopt any restrictions on horizontal well authorization as set forth in the Request.

Two responses to the Request were filed with the Board. The first was filed on October 8, 2014 by Richard Barton, as Trustee of the Richard Gareth Barton Revocable Trust, Mark Barton, and Paul Barton, surface owners of lands within the area at issue. Mr. Richard Barton was present at the hearing but only made a statement to the Board after BBC's and EPE's and the Division's presentations in chief. The second was filed on October 14, 2014 by Linda A. Green, an unleased mineral owner in lands within the area at issue. However, Ms. Green did not appear at the hearing.

At the conclusion of BBC's and EPE's and the Division's presentations in chief, along with Mr. Barton, Andrew Ketterer, a surface owner, also made a statement to the Board.

No other party filed a response to the Request and no other party appeared or participated at the hearing.

The Board, having considered the testimony presented and the exhibits received into evidence at the hearing, being fully advised, and for good cause, hereby makes the following findings of fact, conclusions of law and order in this Cause.

FINDINGS OF FACT

1. BBC is a Delaware corporation with its principal place of business in Denver, Colorado, and EPE is a Delaware limited partnership with its principal place of business in Houston, Texas. Both are duly qualified to conduct business in the State of Utah, and are fully and appropriately bonded with all relevant Federal, Indian and State of Utah agencies.

2. BBC and EPE are the primary working interest owners in, and operators of existing wells located on, the following Duchesne County, Utah lands:

Township 2 South, Range 4 West, USM

Sections 19 through 36 inclusive

Township 2 South, Range 5 West, USM

Sections 19 through 36 inclusive

Township 3 South, Range 4 West, USM

Sections 4 through 10, 14 through 21, 23, 27,
and 30 through 33

Township 3 South, Range 5 West, USM

Sections 1 through 36 inclusive

Township 3 South, Range 6 West, USM

Sections 1 through 36 inclusive

Township 3 South, Range 7 West, USM

Sections 1 through 36 inclusive

Township 3 South, Range 8 West, USM

Sections 25 and 36

Township 4 South, Range 5 West, USM

Sections 2 through 22, and 30

Township 4 South, Range 6 West, USM

Sections 1 through 36 inclusive

Township 4 South, Range 7 West, USM

Sections 1 through 36 inclusive

Township 4 South, Range 8 West, USM

Sections 1, 12, 13, 24, 25, and 36

(collectively the “Subject Lands”). The Subject Lands comprise what BBC refers to as its “Black Tail Ridge” and “Lake Canyon” fields, and the western portions of what is commonly referred to as the “Altamont” field.

3. By Order entered on December 30, 2008 in Cause No. 139-84 (the “139-84 Order”), the Board modified numerous previously entered orders applicable to the Altamont/Bluebell/Cedar Rim fields, which established sectional drilling units for the

production of oil, gas and associated hydrocarbons from the Lower Green River-Wasatch formations (defined with several different stratigraphic equivalents), to allow up to four (4) producing wells upon each such drilling unit, including the drilling units comprised of each section of the following Subject Lands:

Township 2 South, Range 4 West, USM

Sections 19 through 33 inclusive

Township 2 South, Range 5 West, USM

Sections 19 through 36 inclusive

Township 3 South, Range 5 West, USM

Sections 1 through 12, 16 through 21,
and 28 through 33

Township 3 South, Range 6 West, USM

Sections 1 through 36 inclusive

Township 3 South, Range 7 West, USM

Sections 1, 12, 13, 24, 25, and 36

Township 4 South, Range 6 West, USM

Sections 1 through 18 inclusive.

Said wells are to be drilled at the option of the operator and with the operator's full discretion as to the development of the hydrocarbon resources; provided that each well

shall be no closer than 1,320 feet from an existing unit well completed and producing from the formations and no closer than 660 feet from the drilling unit boundary. The 139-84 Order does not specifically address whether the authorized wells are to be just vertical/directionally drilled wells or may also include horizontal wells.

4. By Order entered on March 11, 2010 in Cause No. 139-85 (the “139-85 Order”), the Board first established the following Subject Lands as sectional drilling units for the production of oil, gas and associated hydrocarbons from the Lower Green River-Wasatch formations, defined as follows

the interval from the top of the Lower Green River formation (TGR₃ marker) to the base of the Green River-Wasatch formations (top of Cretaceous), which base is defined as the stratigraphic equivalent of the Dual Induction Log depths of 16,720 feet in the Shell-Ute 1-18B5 well located in the S½NE¼ of Section 18, Township 2 South, Range 5 West, U.S.M., and 16,970 feet in the Shell-Brotherson 1-11B4 well located in the S½NE¼ of Section 11, Township 2 South, Range 4 West, U.S.M:

Township 4 South, Range 5 West, USM

Sections 7 through 18 inclusive

Township 4 South, Range 7 West, USM

Sections 1 through 5, and 8 through 16.

The Board then extended application of the 139-84 Order not only to the lands described immediately above, but also to the following Subject Lands for which section drilling

units had been previously established under previous Board orders but were not originally included in the 139-84 Order:

Township 3 South, Range 5 West, USM

Sections 13 through 15, 22 through 27,
and 34 through 36

Township 3 South, Range 7 West, USM

Sections 2 through 11, 14 through 23,
26 through 29, and 32 through 35.

5. By Order entered on December 6, 2011 in Cause No. 139-87 (the “139-87 Order”), the Board first established first established the following Subject Lands as sectional drilling units for the production of oil, gas and associated hydrocarbons from the Lower Green River-Wasatch formations, defined in the same manner as under the 139-85 Order:

Township 4 South, Range 5 West, USM

Sections 19 through 22, and 30

Township 4 South, Range 6 West, USM

Sections 19 through 36 inclusive

Township 4 South, Range 7 West, USM

Sections 6, 7, and 17 through 36

Township 4 South, Range 8 West, USM

Sections 1, 12, 13, 24, 25, and 36.

The Board then extended application of the 139-84 and 139-85 Orders not only to the lands described immediately above, but also to the following described Subject Lands for which sectional drilling units had been previously established under a prior Board order but were not originally included in the 139-84 or 139-85 Orders:

Township 3 South, Range 7 West, USM

Sections 30 and 31

Township 3 South, Range 8 West, USM

Sections 25 and 36.

Additionally, the Board expressly clarified that the authorized wells could be all vertical, all horizontal, or a combination of both, and expressly eliminated any specific quarter section location requirement for the first well upon such units.

6. By Order entered on May 9, 2012 in Cause No. 139-90 (the “139-90 Order”), the Board extended application of the 139-84 Order to the following Subject Lands for which sectional drilling units had been previously established under a prior Board order but were not originally included in the 139-84 Order:

Township 2 South, Range 4 West, USM

Sections 34 through 36 inclusive

Township 3 South, Range 4 West, USM

Sections 4 through 10, 14 through 21, 23, 27,
and 30 through 33.

Additionally, the Board expressly clarified that the authorized wells could be all vertical, all horizontal, or a combination of both, and expressly eliminated any specific quarter location requirement for the first well upon such units.

7. BBC and EPE have drilled numerous wells upon the Subject Lands, including horizontal wells targeting specific members of the Lower Green River-Wasatch formations to assess their viability for field-wide application. Data developed from these wells suggested that a four well density may not adequately be recovering all of the Lower Green River-Wasatch resources within each drilling unit.

8. As a consequence, BBC petitioned for, and the Board granted and authorized, two pilot programs to test the viability of an equivalent 80-acre well density. Specifically, by Order entered on April 16, 2012 in Cause No. 139-89 and on June 7, 2012 in Cause No. 139-91, the Board authorized, on a pilot basis, additional wells upon the drilling units comprised of Sections 12 and 13, T4S, R6W, USM, and of Section 5, T3S, R5W, USM, respectively, to achieve the equivalent of an approximate 80-acre well density thereon; provided no productive interval of any well so authorized may be closer

than 660 feet to a sectional boundary or 990 feet to another producing well in the Lower Green River-Wasatch formations without an exception location approval. In addition, the Board required BBC to report back to the Board within two years of the respective dates of entry of said Orders on the success or failure of the pilots. EPE subsequently elected to participate with BBC in the Section 5 pilot.

9. In accordance with the Board's mandate, the pilot test results for Sections 12 and 13, T4S, R6W, USM, were filed on April 17, 2014 but were initially classified as confidential under the provision of the Utah Governmental Records Access and Management Act. BBC drilled five (5) pilot wells, the first four of which were drilled on an equivalent 80-acre density pattern in relation to other wells. The data from these wells and the existing producing wells located in these sections reflect:

- a) The Wasatch Formation is primarily comprised of discontinuous lenticular sands many of which cannot be correlated between wells on 80-acre density. The following reservoir characterization and well communication description used to establish 160-acre (four) well density can be applied to 80-acre (eight) well density as well:

Production occurs from a complex series of isolated and discontinuous beds randomly distributed vertically over a several thousand foot interval. The low matrix permeability and the nature of the natural fracture components of the reservoir reduce the effect of communication with the sand bodies that do correlate and does not allow for efficient drainage of the hydrocarbon resource;

- b) Cased Hole Dynamics Tester (“CHDT”) pressure tests show that wells with a NE-SW or NW-SE offset represent an optimal orientation. The optimal oriented wells have consistent and normal reservoir pressures and show little to no depletion. These results indicate little to no communication between wells with 80-acre density and thus representing optimal well orientation. Wells with a north-south orientation have less consistent pressure and are more depleted in the Wasatch Formation indicating a moderate level of communication relative to the optimal orientation. These pressure tests indicate optimal well orientation is critical for future development on 80-acre density;
- c) Hydraulically fracturing in the Wasatch and Lower Green River Formations take place relatively close to the wellbore with the fracturing events taking place further out in the Wasatch indicating a more brittle reservoir rock resulting in a more complex fracture network. Fracture orientation was N05°E with average length of 360’ to the north and 280’ to the south. Fracture height averaged 200’ with no overlap of height growth between adjacent stages. The most events and the events furthest from the wellbore took place in the middle of each stage. Hydraulic fracturing creates non-overlapping drainage ellipses for each 80-acre well as long as wells have the optimal orientation of NE-SW or NW-SE offsets. It is essential to avoid direct North-South spacing to account for the N05°E fracture orientation and subsequent drainage ellipses indicated by the CHDT tests;
- d) Production on 80-acre spacing for wells with the optimal orientation is consistent with the average EUR type curve established by wells on minimum 160-acre density spacing. The wells with a north-south orientation perform below the type curve due to overlap of the drainage ellipses indicated by the apparent depletion seen from the CHDT testing. As seen on the production logs, production contribution by formation is the essentially the same for 80-acre and 160-acre density indicating consistent reservoir properties and a lack of communication between wells. Once again, it is essential to avoid north-south well orientation;
- e) Chemical tracers were pumped during hydraulic fracturing in three intervals for each well; Black Shale Facies-Uteland Butte, Uteland Butte-Wasatch, Wasatch-Total Depth. Samples were then collected from each well to

determine which tracers from which well by interval were present. Where a tracer is found in a neighboring well communication is present. Communication was greater in the Wasatch than in the Lower Green River Formation and communication between wells on a north-south orientation was considerably greater than what was seen with the optimal orientation. This is interpreted to mean there exists little to no communication between wells with optimal orientation and moderate communication between wells with a north-south orientation. Once again, it is essential to avoid north-south well orientation;

- f) The production forecast for the average production from the optimal 80-acre wells in the pilot study is also representative of the other 160-acre wells drilled in the immediate area, proving that infill drilling is economic and provides sufficient reserves if drilled on an offset pattern; and
- g) Fitting a forecast to the current average production for the non-optimal wells (with N-S offsets) does not meet the payout threshold and such wells are therefore uneconomic. The economic results further illustrate that infill wells should not be drilled in a direct North-South orientation.

10. In accordance with the Board's mandate, the pilot test results for Section 5, T3S, R5W, USM, were filed on April 28, 2014 but were initially classified as confidential under the provisions of Utah Governmental Records Access and Management Act. BBC, with EPE's participation, drilled seven (7) pilot wells on an equivalent 80-acre density pattern in relation to the other wells. The data from these wells reflect:

- a) The Wasatch Formation is primarily comprised of discontinuous lenticular sands many of which cannot be correlated between wells on 80-acre density. The following reservoir characterization and well communication description used to establish 160-acre (four) well density can be applied to 80-acre (eight) well density as well:

Production occurs from a complex series of isolated and discontinuous beds randomly distributed vertically over a several thousand foot interval. The low matrix permeability and the nature of the natural fracture components of the reservoir reduce the effect of communication with the sand bodies that do correlate and does not allow for efficient drainage of the hydrocarbon resource;

- b) Fracturing events in the Wasatch and Lower Green River take place relatively close to the wellbore and do not overlap between wells. These fractures create non-overlapping drainage ellipses for each 80-acre well as long as wells are oriented NE-SW or NW-SE relative to each other. Fracture orientation was N24°E with average length of 270' to the north and 255' to the south and average fracture network width of 225'. Fracture height averaged 200' with no overlap of height growth between adjacent stages. It is essential to avoid direct North-South spacing to account for the N24°E fracture orientation and subsequent parallel drainage ellipse;
- c) Production on 80-acre spacing is consistent with analogous 160-acre well production in the area;
- d) Oil production by formation is similar for all wells completed over the entire interval indicating consistent reservoir characteristics. If communication were present, reservoir characteristics would vary resulting in an inconsistent production profile;
- e) Chemical tracers were pumped during hydraulic fracturing in two intervals for each well; Castle Peak-Uteland Butte and Uteland Butte-Total Depth. Samples were then collected from each well to determine which tracers from which well by interval were present. Where a tracer is found in a neighboring well communication is present. Where present, communication between wells averaged one part per billion of tracer present. This is interpreted to mean that virtually no communication exists between wells. Data was taken relatively quickly after fracking so it does not account for fracture closure with time which would decrease communication; and

f) Fitting a forecast to the current average production data for the seven pilot wells provides sound economic returns and prolific reserves for this previously undeveloped area.

11. The exhibits and testimony received into evidence reflect the pilot results may be properly extrapolated to all of the Subject Lands.

12. Establishing a 990-ft. setback from other wells producing in the Lower Green River-Wasatch formations, and maintaining the 660-ft. setback from a sectional drilling unit boundary, should minimize if not eliminate communication between wells and is protective of correlative rights. However, a well may be located closer than 990 feet to an existing horizontal well so long as it is not perforated and completed in the same zone from which the horizontal well produces.

13. The producing formations are roughly 2,000 vertical feet with low permeability confining beds above and below the numerous isolated reservoirs. Horizontal development targets specific reservoirs while bypassing all hydrocarbons in-between the horizontal production zones. BBC and EPE have represented that the most efficient and economical way to produce all of the hydrocarbons from the Subject Lands is through vertical/directionally drilled well development on 80-acre density so that the entire production interval can be accessed and completed.

14. Notwithstanding Findings of Fact No. 13 above, the Board does not deem it appropriate to place any restrictions on potential horizontal well development within the

existing sectional drilling units. Based on the evidence and testimony, the wells authorized hereby may be either all vertical/directional, all horizontal, or a combination of both, maintaining the same 660-ft. setback from the sectional drilling unit boundary and 990-ft. setback between wells producing in the same zone. This will ensure all potential development schemes are available to maximize resource recovery from each drilling unit without waste and protect correlative rights.

15. A copy of the Request was mailed, postage pre-paid, certified with return receipt requested, and properly addressed to all working interest owners, including unleased owners, within the Subject Lands, and to the Bureau of Indian Affairs, Utah School and Institutional Trust Lands Administration, Utah Division of Forestry, Fire and State Lands and the Bureau of Land Management as the governmental agencies having jurisdiction over portions of the oil and gas estates in the Subject Lands. The mailings were made, to the best of BBC's and EPE's knowledge, to the last addresses of said parties as disclosed by a search of the Agencies' and Duchesne County realty records.

16. Notice of the filing of the Request and of the hearing thereon was duly published in the Salt Lake Tribune and the Deseret Morning News on October 5, 2014 and the Uintah Basin Standard on October 7, 2014.

17. The vote of the Board Members present and participating in the hearing on this Cause was unanimous (6-0) in favor of granting the Request, with the modification as outlined in Finding of Fact No. 14 above.

CONCLUSIONS OF LAW

1. Due and regular notice of the time, place and purpose of the hearing was properly given to all parties whose legally protected interests are affected by the Request in the form and manner as required by law and the rules and regulations of the Board and Division.

2. The Board has jurisdiction over all matters covered by the Request and all interested parties therein, and has the power and authority to render the order herein set forth pursuant to Utah Code Ann. §§ 40-6-5(3)(b) and 40-6-6 and Utah Admin. Code Rule R649-2-1(2).

3. The Board takes judicial notice of the Pilot Results Reports filed on April 17, 2014 in Cause No. 139-89 and on April 28, 2014 in Cause No. 139-91 pursuant to Utah Code Ann. § 63G-4-206(1)(b)(iv).

4. Up to eight (8) wells, vertically or directionally drilled on an optimum NW-SE or NE-SW orientation, or horizontally, or a combination of both, are required to

efficiently and economically drain each existing sectional Lower Green River-Wasatch formation drilling unit and to prevent waste (by leaving resources in the ground).

5. Correlative rights will be protected by virtue of the setbacks outlined below.

6. The Board has the authority under Utah Admin. Code Rule R649-2-1(2) to modify the requirement of Utah Admin. Code Rules R649-3-3 and R649-3-11(1.1).

7. BBC and EPE have demonstrated good cause as to why Utah Admin. Code Rules R649-3-3 and R649-3-11(1.1) should be deemed inapplicable so long as the initial intersection with the Lower Green River-Wasatch formations, all productive intervals, and the bottom hole location of a directionally drilled well are all within the above described setbacks, and that BBC and EPE (or their successor operators) will provide to the Division, along with an application for permit to drill relating to such a well, a self-certification that no perforations above the top of the Lower Green River will be made without an exception location approval and consents as circumstances may require under said regulations.

8. Neither Respondent provided credible evidence rebutting any of the Findings of Fact made above.

9. The relief granted hereby will result in consistent and orderly development and the greatest recovery of oil, gas and associated hydrocarbons from the Lower Green

River-Wasatch formations and underlying the Subject Lands, prevent waste and adequately protect the correlative rights of all affected parties.

10. BBC and EPE have sustained their burden of proof, demonstrated good cause, and satisfied all legal requirements for granting of the Request.

ORDER

Based upon the Request, testimony and evidence submitted, and the findings of fact and conclusions of law stated above, the Board hereby orders:

1. The Request in this cause is granted.
2. The 139-84, 139-85, 139-87 and 139-90 Orders are hereby modified to authorize additional wells for the production of oil, gas and associated hydrocarbons from the Lower Green River-Wasatch formations to achieve an equivalent 80-acre well density on each of the existing sectional drilling units comprising the Subject Lands (as defined above). Said wells may be all vertically/directionally drilled, all horizontal, or a combination of both.
3. Each additional well so authorized may neither be drilled closer than 660 feet to a sectional boundary, nor, subject to the provisions of (4) and (5) below, 990 feet to another well producing in the Lower Green River-Wasatch formations without an exception location approval in accordance with Utah Admin. Code Rule R649-3-3 (or subsequently enacted similar regulation).

4. So long as the initial intersection with the Lower Green River-Wasatch formations, all productive intervals, and the bottom hole location of a directionally drilled well so authorized are all within the setbacks set forth under (3) above, no additional exception location approval or consents under Utah Admin. Code Rules R649-3-3 and R649-3-11(1) are required. With respect thereto, BBC and EPE (or their successor operators) will provide to the Division, along with an application for permit to drill relating to such a well, a self-certification that no perforations above the top of the Lower Green River will be made without an exception location approval and consents as circumstances may require under said regulations.

5. Any additional well so authorized may be located closer than 990 feet to an existing horizontal well only if it is not perforated in and does not produce from the same zone from which the horizontal well produces.

6. All existing wells from the Subject Lands are deemed to be at lawful locations notwithstanding the relief granted under this Order.

7. Pursuant to Utah Admin. Code Rules R641 and Utah Code Ann. § 63G-4-204 to 208, the Board has considered and decided this matter as a formal adjudication.

8. This Order is based exclusively on evidence of record in the adjudicative proceeding or on facts officially noted, and constitutes the signed written order stating the Board's decision and the reasons for the decision, all as required by the Administrative

Procedures Act, Utah Code Ann. § 63G-4-208 and Utah Administrative Code Rule R641-109.

9. Notice re: Right to Seek Judicial Review by the Utah Supreme Court or to Request Board Reconsideration: As required by Utah Code Ann. § 63G-4-208(e) - (g), the Board hereby notifies all parties in interest that they have the right to seek judicial review of this final Board Order in this formal adjudication by filing a timely appeal with the Utah Supreme Court within 30 days after the date that this Order issued. Utah Code Ann. §§ 63G-4-401(3)(a) and 403. As an alternative to seeking immediate judicial review, and not as a prerequisite to seeking judicial review, the Board also hereby notifies parties that they may elect to request that the Board reconsider this Order, which constitutes a final agency action of the Board. Utah Code Ann. § 63G-4-302, entitled, "Agency Review – Reconsideration," states:

(1)(a) Within 20 days after the date that an order is issued for which review by the agency or by a superior agency under Section 63G-4-301 is unavailable, and if the order would otherwise constitute final agency action, any party may file a written request for reconsideration with the agency, stating the specific grounds upon which relief is requested.

(b) Unless otherwise provided by statute, the filing of the request is not a prerequisite for seeking judicial review of the order.

(2) The request for reconsideration shall be filed with the agency and one copy shall be sent by mail to each party by the person making the request.

(3)(a) The agency head, or a person designated for that purpose, shall issue a written order granting the request or denying the request.

(b) If the agency head or the person designated for that purpose does not issue an order within 20 days after the filing of the request, the request for reconsideration shall be considered to be denied.

Id. The Board also hereby notifies the parties that Utah Admin. Code Rule R641-110-100, which is part of a group of Board rules entitled, “Rehearing and Modification of Existing Orders,” states:

Any person affected by a final order or decision of the Board may file a petition for rehearing. Unless otherwise provided, a petition for rehearing must be filed no later than the 10th day of the month following the date of signing of the final order or decision for which the rehearing is sought. A copy of such petition will be served on each other party to the proceeding no later than the 15th day of the month.

Id. See Utah Admin. Code Rule R641-110-200 for the required contents of a petition for Rehearing. If there is any conflict between the deadline in Utah Code Ann. § 63G-4-302 and the deadline in Utah Admin. Code Rule R641-110-100 for moving to rehear this matter, the Board hereby rules that the later of the two deadlines shall be available to any party moving to rehear this matter. If the Board later denies a timely petition for rehearing, the party may still seek judicial review of the Order by perfecting a timely appeal with the Utah Supreme Court within 30 days thereafter.

The Board retains continuing jurisdiction over all the parties and over the subject matter of this cause, except to the extent said jurisdiction may be divested by the filing of a timely appeal to seek judicial review of this order by the Utah Supreme Court.

For all purposes, the Chairman's signature on a faxed copy of this Order shall be deemed the equivalent of a signed original.

DATED this 6th day of November, 2014

**STATE OF UTAH
BOARD OF OIL, GAS AND MINING**

By: 
Susan S. Davis, Chairman Pro Tem

1000.32/1100.12

CERTIFICATE OF SERVICE

I hereby certify that on this 7th day of November, 2014, I caused a true and correct copy of the foregoing **FINDINGS OF FACT, CONCLUSIONS OF LAW AND ORDER** for Docket No. 2014-035, Cause No. 139-124, to be mailed by Email or via First Class Mail with postage prepaid, to the following:
